PROFESSIONAL SUMMARY

Motivated IT student with hands-on experience in software development, including Java and MySQL, complemented by a strong foundation in front-end technologies like React and TailwindCSS. Adept at developing and deploying responsive web applications and collaborating on innovative software projects.

PROJECTS

Pantry

2026-2026

full stack developer

- Built a pantry management app that lets users add items by entering their name and price, making it easy to keep track of available products.
- Added a search feature that lets users look up items they have added, showing only products that are in the pantry
- Implemented a cart system where users can click on a product to add it to their cart, with a running total that updates automatically.
- Designed a clean and simple interface so users can easily manage their pantry, search for items, and view or adjust their cart at any time.

RipeSense

2026 - 2026

Full stack developer

- Developed a Flutter app for real-time display of ripeness and weight, improving agricultural monitoring efficiency.
- Integrated Arduino sensors with the mobile app using Bluetooth communication, enhancing data accuracy and user interaction
- Implemented signal processing on sensor data to calculate tap frequency and determine ripeness, ensuring reliable results.
- Designed a user-friendly interface for interactive monitoring, making the app accessible to less tech-savvy users.

Ingredi Search

2025 - 2025

Front end developer

- Designed and implemented a responsive web interface for a recipe search app using HTML, CSS, and JavaScript, enhancing user engagement and experience.
- Enabled users to search recipes by ingredient with real-time display of results from a public API.
- Focused on UI/UX and functionality to ensure a seamless user journey without backend integration.

GrandView

2025 - 2025

Frontend Developer

- Developed a responsive property listing web app using Tailwind CSS, React, and JavaScript, streamlining the property browsing experience
- Implemented functionality for admins to post properties with detailed descriptions and images, enhancing administrative efficiency.
- Created a user-facing interface to efficiently browse and view listed properties, ensuring a mobile-friendly design and smooth UI interactions across devices.

EDUCATION

City College of Tagaytay

Bachelor of Science in Information Technology

2023 – Expected 2027

Tagaytay City, Philippines

SKILLS

▪ **Skills:** React; Tailwind CSS; Java; Springboot; Flutter; Dart; JavaScript
